

Question	Marking Guidance	Mark	Comments
03.1	Increase in <u>aerobic</u> respiration OR Increase in/more mitochondria OR Increase in/more slow muscle fibres;	1 max	Ignore: reference to Krebs cycle as this in the stem of the question.
03.2	1. (More aerobic respiration) produces more <u>ATP</u> ; 2. Anaerobic respiration delayed; 3. Less or no lactate;	3	1. Accept: produces <u>ATP</u> faster. 2. Accept: aerobic respiration can continue. 2. Accept : no anaerobic respiration. 3. Accept: lactic acid.
03.3	1. Correct answer in range 84 to 84.2 = 2 marks;; 2. For one mark accept incorrect answer but shows r (radius) = 0.63 (mm) OR d (diameter) = 1.26 (mm);	2	2. Ignore: numbers after 0.63 and 1.26.
03.4	1. A numerical comparison of range = 2 marks i.e. Young (fibres) range 14/15 – 47/48 (µm) and adult (fibres) 17/18 - 86/87/88 (µm) OR Young (fibres) range 32/33/34 and adult (fibres) range 68/69/70/71; 2. Comparison of range without numbers = one mark i.e. Adult (fibres) greater range/spread/variation (of diameters) OR Young (fibres) smaller range/spread (of diameters);	2 max	1. Accept: one mark for comparison of minimum values i.e. 14/15 compared to 17/18 Allow one mark for comparison of maximum values i.e. 47/48 compared to 86/87/88. 1. Note: comparison of both maximum and minimum values = 2 marks .

	3. Comparison of mode = one mark i.e. Adult (fibres) peak/most common/frequent/mode at 50 (μm) and young (fibres) peak/most common/frequent/mode at 30 (μm);		3. Accept: adult (fibres) peaks at higher diameter or young (fibres) peak/most frequent at lower diameter. 3. Reject: reference to mean/average.
