

- 33** The table shows the blood pressures in different parts of the circulatory system of a person sitting at rest.

| parts of the<br>circulatory system | blood pressure<br>/ kPa |
|------------------------------------|-------------------------|
| aorta                              | 16.0                    |
| arteriole                          | 11.3                    |
| arterial end of capillary          | 4.7                     |
| venous end of capillary            | 1.3                     |
| vein                               | 0.6                     |

What is the percentage decrease in blood pressure between the arteriole and the arterial end of a capillary?

- A** 42%      **B** 58%      **C** 142%      **D** 240%
