

4(a)	<i>disaccharides</i> - two, monosaccharides / sugar monomers / sugar units / simple sugars ; R sugar molecule <i>polysaccharides</i> - more than two / three or more / many / large number of, monosaccharides / sugar monomers / sugar units / simple sugars ; A sugar molecule / carbohydrate monomer <i>if 'monomers' is the only term given for both allow one mark (unless contradicted e.g. amino acids are monomers)</i> correct ref. to glycosidic bond(s) ;	2
4(b)(i)	<i>max 2 if large vacuole or nucleus drawn</i> 1 sieve plate drawn and labelled ; A sieve pore label <i>must be to a gap</i> <i>doesn't need to show pores</i> I plasmodesmata <i>any two from</i> 2 cytoplasm labelled and drawn as, thin layer against wall / patches ; <i>if drawing not clear, allow if label indicates peripheral cytoplasm</i> 3 mitochondrion / mitochondria, drawn within cytoplasm / at edge, and labelled ; <i>internal details not required</i> 4 endoplasmic reticulum drawn within cytoplasm / at edge, and labelled ; A ER R RER / SER <i>if no indication of peripheral cytoplasm, or structures located within peripheral cytoplasm / at edge, allow one mark for drawing and labels of <u>two</u> of mp2,3,4</i> 5 cell surface membrane drawn in (close to cell wall) and labelled ; A plasma membrane 6 AVP ; e.g p-proteins drawn as, strands / AW, and labelled plasmodesmata shown as strands of cytoplasm entering sieve tube cell from companion cell and labelled	3

Question	Answer	Marks
4(b)(ii)	influx / entry / AW, of sucrose / organic compounds / assimilates / photosynthates / named ; A active loading <i>for entry</i> R active transport / cotransport / facilitated diffusion R incorrect cell type named as donor cell e.g. xylem / mesophyll <i>must have idea of entry – stating that they are present in the phloem sieve tube is not enough</i> water enters (from xylem), by osmosis / down water potential gradient / from high(er) to low(er) water potential / from less negative to more negative water potential ; A Ψ for water potential A water enters, increasing volume	2
