

Question number	Answer	Mark
1(a)	The only correct answer is C <i>A is incorrect as photolysis takes place on the thylakoid membranes and P is a ribosome</i> <i>B is incorrect as photolysis takes place on the thylakoid membranes and R is the stroma</i> <i>D is incorrect as photolysis takes place on the thylakoid membranes and V is DNA</i>	(1)

Question number	Answer	Mark
1(b)	The only correct answer is D <i>A is incorrect as DNA contains genes and P is a ribosome</i> <i>B is incorrect as DNA contains genes and Q is a starch grain</i> <i>C is incorrect as DNA contains genes and S is DNA thylakoid</i>	(1)

Question number	Answer	Mark
1(c)	The only correct answer is C <i>A is incorrect as hydrogen ions accumulate in the thylakoids and Q is a starch grain</i> <i>B is incorrect as hydrogen ions accumulate in the thylakoids and R is the stroma</i> <i>D is incorrect as hydrogen ions accumulate in the thylakoids and V is DNA</i>	(1)

Question number	Answer	Mark
1(d)(i)	The only correct answer is C <i>A is incorrect as T, U and W are all made of phospholipids</i> <i>B is incorrect as T, U and W are all made of phospholipids</i> <i>D is incorrect as T, U and W are all made of phospholipids</i>	(1)

Question number	Answer	Mark
1(d)(ii)	The only correct answer is A <i>B is incorrect as phospholipids are made of a glycerol attached to two fatty acids and one phosphate group</i> <i>C is incorrect as phospholipids are made of a glycerol attached to two fatty acids and one phosphate group</i> <i>D is incorrect as phospholipids are made of a glycerol attached to two fatty acids and one phosphate group</i>	(1)

Question number	Answer	Additional guidance	Mark
1(e)	• (0.0085 cm =) 85 (μm) (1) • 7.3 (μm) (1) OR • length in cm calculated (1) • 7.3 (μm) (1)	Bald answer of 7.3 = 2 marks Bald answer of 85 (μm) = 1 mark Bald answer with the values (7.2649572 / 0.00072649572) correctly rounded but not to 2 sig figs = 1 mark Bald answer to 2 sig figs but wrong order of magnitude = 1 mark	(2)
