

- 26** The diagram shows the results of an experiment using leaves with the same surface area from two different species of plant. Each leaf was left on a balance in daylight in a closed room and its mass recorded at 1 hour intervals.

Which features of leaf 2 could explain these results?

- 1 more stomata per unit area of leaf
- 2 fewer trichomes (hairs) on the leaf
- 3 sunken stomata
- 4 thinner cuticle

A 1, 2 and 3 **B** 1, 2 and 4 **C** 1 and 4 only **D** 2 and 3 only
