

Question	Marking Guidance		Mark	Comments
06.1			3 max (3 x AO1)	Must be comparisons
	mRNA	tRNA		
	1. (Has) codon(s)	(Has) anticodon;		3. Accept description of binding site, eg amino acid only bound to tRNA
	2. No hydrogen/H bonds/base pairs	Has hydrogen/H bonds/base pairs;		3. Accept mRNA cannot carry an amino acid, tRNA can
	3. No amino acid binding site	Has amino acid binding site;		
	4. Linear/straight/not folded	‘Clover (leaf’ shape)/folded;		
	5. Long/many nucleotides/bases	Short/few nucleotides/bases;		

Question	Marking Guidance	Mark	Comments
06.2	Phe, Arg, Ala;	1 (1 x AO2)	Reject if order is different

Question	Marking Guidance	Mark	Comments
06.3	(Name of mutation) 1. (Single base) substitution; (Change in DNA) 2. Guanine to thymine OR G to T OR GCC to TCC; (Explanation) 3. (So) Arg (still) present OR No change in amino acid; 4. (So) no change in primary structure OR (So) no change in tertiary structure OR	4 (4 x AO2)	Marks can be achieved in any section 2. Reject thiamine 3. Reject amino acids are formed

	(So) no change in active site (shape);
