

Question Number	Answer	Additional guidance	Mark
6(a)	The correct answer is B endemic <i>A is incorrect because the correct term is endemic</i> <i>C is incorrect because the correct term is endemic</i> <i>D is incorrect because the correct term is endemic</i>		(1)

Question Number	Answer	Additional guidance	Mark
6(b)	An answer that makes reference to the following: • anatomical (adaptation) (1) • physiological (adaptation) (1) • anatomical (adaptation) (1)		(3)

Question Number	Answer	Additional guidance	Mark
6(c)	An answer that makes reference to the following: • {poison / skin colour/ spots} deters predators / reduce risk of predation (1) • adhesive discs allow the frog to {climb / cling to} surfaces (to find food) (1)	Accept reduce risk of being eaten / protects frog from predators Ignore camouflage e.g. trees / leaves	(2)

Question Number	Answer	Additional guidance	Mark
6(d)	An answer that makes reference to four of the following: • (genetic) mutation(s) occurred (1) • (new) allele coding for poison production (1) • (which then) conferred a selective advantage / (those with poison) more likely to {survive and reproduce / pass alleles to offspring} (1) • (therefore) increasing allele frequency (1) • (resulting in) new species of frog with the ability to produce poison evolved (1)	Ignore genes Accept those without the {mutation / poison / advantageous allele} were less likely to survive and reproduce	(4)
