

- 19** A sample of 500 cells dividing by mitosis was examined to identify the stage of mitosis for each cell.

The table shows the results.

stage of mitosis	percentage of cells in the stage
late prophase	23
end of metaphase	45
between the start of anaphase and the end of telophase	24

Which row is correct?

	number of cells with chromosomes at the equator of the cell	number of cells with separated chromatids
A	225	120
B	225	345
C	380	120
D	380	345
