

14 The diagram shows an enzyme, its substrate and an enzyme/substrate complex.

Which statement explains how the substrate is able to enter the active site of the enzyme?

- A** Contact between the substrate and the enzyme causes a change in the enzyme shape.
- B** The shape of the active site and the shape of the substrate are complementary.
- C** The substrate within the active site forms hydrogen bonds with amino acids.
- D** When the enzyme/substrate complex forms, the tertiary structure of the enzyme changes.
