

16 A student wrote three statements about cell signalling.

- 1 A signal chemical always has the same shape as a protein receptor on a target cell.
- 2 An increase in temperature may decrease the effect of cell to cell signalling.
- 3 A mutation may decrease production of active protein receptors for the cell surface membrane.

Which statements are correct?

- A** 1, 2 and 3 **B** 1 and 3 only **C** 1 only **D** 2 and 3 only
