

13 Which statements are correct for the lock and key hypothesis **and** the induced fit hypothesis of enzyme action?

- 1 The substrate is the same shape as the active site.
- 2 The substrate is held in place in the active site by temporary bonds.
- 3 The enzyme and sometimes the substrate change shape slightly as the substrate molecule enters the enzyme.

A 1 and 2

B 1 and 3

C 2 only

D 3 only
