

Question number	Answer	Additional guidance	Mark
3(a)(i)	An answer that includes the following point: B is the correct answer • A is not the correct answer as adrenal glands do not produce ADH • C is not the correct answer as the medulla oblongata does not produce ADH • D is not the correct answer as the pituitary gland does not produce ADH		(1)

Question number	Answer	Additional guidance	Mark
3(a)(ii)	An answer that includes the following point: B is the correct answer • A is not the correct answer as ADH does not act on the capillaries • C is not the correct answer as ADH does not act on the proximal tubules • D is not the correct answer as ADH does not act on the ureters		(1)

Question number	Answer	Additional guidance	Mark
3(a)(iii)	An answer that includes the following point: C is the correct answer • A is not the correct answer as the countercurrent multiplier does not control plasma volume • B is not the correct answer as habituation is a behavioural response • D is not the correct answer as control of plasma volume is not a positive feedback		(1)

Question number	Answer	Additional guidance	Mark
3(a)(iv)	• osmoreceptors	ACCEPT osmotic receptor	(1)

Question number	Answer	Additional guidance	Mark
3(b)(i)	An answer that includes the following points: - increasing concentration of the gibberellin increases {length / growth} (of all internodes) (1) - increase is mostly in the length of the first internode (1)	ACCEPT positive correlation ignore gibberellin increases plant growth unqualified ACCEPT {least / smallest} effect on the last/3rd internode	(2)

Question number	Answer	Additional guidance	Mark
3(b)(ii)	An answer that includes three of the following points: - gibberellin {enters the nucleus / binds to cell surface receptors} (1) - gibberellin {acts as a transcription factor / activates transcription factor} (1) - effect of transcription factor (1) (causing) cell elongation / cell division (and causes internode elongation) (1)	ACCEPT secondary messenger e.g. activates protein synthesis / stimulates amylase production / amylase breaking starch down into glucose for respiration	(3)
