

- 11 The graph shows the effect of substrate concentration on the rates of reaction of three enzymes, X, Y, and Z.

What is the correct order of affinity of these enzymes for their substrates, starting with the enzyme with the highest affinity?

- A** $X \rightarrow Y \rightarrow Z$ **B** $X \rightarrow Z \rightarrow Y$ **C** $Y \rightarrow X \rightarrow Z$ **D** $Z \rightarrow X \rightarrow Y$
