

Question	Marking Guidance	Mark	Comments
08.1	1. Add biuret (reagent); 2. (Positive result) purple/lilac/violet /mauve;	2	1. Accept sodium hydroxide (solution) and copper sulphate (solution) 1. Reject addition of other incorrect chemicals 2. Reject other colours 2. Ignore references to heating
08.2	Similarities 1. Amine/ NH_2 (group at end); 2. Carboxyl/ COOH (group at end); 3. Two R groups; 4. All contain C and H and N and O; Difference 5. Variable/different R group(s);	3	2 max for similarities Accept for three marks, a labelled diagram of a dipeptide showing $\text{NH}_2/\text{NH}_3^+$, COOH/COO^- and different R groups. 1. Accept amino/ NH_3^+ 2. Accept carboxylic / COO^- 4. Accept examples of different R groups
08.3	1. Moved to negative (electrode) because positive(ly charged); 2. (Spots move) different distances/rates because (amino acids) different charge/mass; 3. Two spots (not three) because (amino acids) same charge/mass OR One spot has 2 amino acids because (amino acids) same charge/mass;	3	2 and 3. Accept size for mass.
