

19 One of the glycoproteins present in the cell surface membrane of human cells is called ICAM-1.

ICAM-1 is a cell adhesion molecule and it is also used by the common cold virus to attach to human cells.

Which statements are true about ICAM-1?

- 1 A drug binding to ICAM-1 to block the common cold virus could stop cells attaching to each other.
- 2 Part of the ICAM-1 structure must be complementary to proteins in the coat of the common cold virus.
- 3 The ICAM-1 structure must have hydrophobic parts to stabilise it within the cell membrane.

A 1, 2 and 3 **B** 1 and 2 only **C** 1 and 3 only **D** 2 and 3 only
