

39 What is correct about the role of memory cells in long-term immunity?

- 1 They divide to form plasma cells and memory cells when the pathogen enters the body a second time.
- 2 They produce a fast response so that the person infected with the pathogen does not become ill again.
- 3 They produce more antibodies than were produced during the primary immune response.
- 4 They remain in the blood and lymphatic system after the pathogen has been destroyed.
