

Question	Marking guidance	Mark	Comments
06.1	1. Measure (each stoma) using eyepiece graticule; 2. Calibrate eyepiece graticule against stage micrometer / ruler / graph paper; 3. Take a number of measurements (to calculate a mean);	3	2. Accept micrometer slide 3. Idea of enough readings for a reliable mean (min. 5)
06.2	1.48;;	2	Accept 1.5 and 1.479 1 mark for PS3 = 7.1 (µm) and ABA = 4.8 (µm)
06.3	1. (Causes less stomatal opening so) less transpiration; OR Less evaporation; OR Less water lost by diffusion; 2. (So more) water available for photosynthesis / metabolism / support; OR (So) less water needed from the (dry) soil;	2	2. Water conserved / retained is insufficient 2. Ignore respiration
06.4	(Closes the stomata so) fewer/no <u>spores</u> enter leaf;	1
