

- 66** A chemical was added to a cell dividing by mitosis. This chemical binds to molecules, preventing the separation of the replicated chromosomes.

Using this information, which of the following effects could this chemical have on this cell division?

- 1** The four daughter cells contain double the normal number of chromosomes.
 - 2** The gametes contain the haploid number of chromosomes.
 - 3** The cell does not divide and contains the diploid number of replicated chromosomes.
-
- A** none of them
- B** 1 only
- C** 2 only
- D** 3 only
- E** 1 and 2 only
- F** 1 and 3 only
- G** 2 and 3 only
- H** 1, 2 and 3
