

17 The electron micrograph shows rod-shaped bacteria.

The actual length of the bacterium is $2.0\text{ }\mu\text{m}$ and the diameter is $0.5\text{ }\mu\text{m}$. Assume that the bacterium is cylinder-shaped.

What is the surface area to volume ratio of the bacterium?

- A** 3.0:1.0 **B** 5.0:1.0 **C** 8.0:1.0 **D** 9.0:1.0
