

0 1 . 1

In the following passage the numbered spaces can be filled with biological terms.

During photosynthesis, plants produce _____ (1) _____ compounds which contain carbon, such as carbohydrates, lipids and proteins. Most of the sugars synthesised by plants are used by the plant in _____ (2) _____. The rest are used to make other groups of biological molecules. These biological molecules form the biomass of the plants. Biomass can be measured in terms of mass of _____ (3) _____ per given area per given time. The chemical energy store in dry biomass can be estimated using _____ (4) _____.

Write the correct biological term beside each number below, that matches the space in the passage.

[2 marks]

(1) _____

(2) _____

(3) _____

(4) _____

Describe the **light-independent** reaction of photosynthesis.
