

Question number	Answer	Mark
7(a)(i)	The only correct answer is A <i>B is incorrect because a person can modify their alcohol intake</i> <i>C is incorrect because a person can modify their blood pressure</i> <i>D is incorrect because a person can change their level of activity</i>	(1)

Question number	Answer	Additional guidance	Mark
7(a)(ii)	An explanation that includes the following points: • because many factors cause CVD (1) • different drugs treat different conditions (1)	ACCEPT two named drugs and what they treat IGNORE wrong drugs	(2)

Question number	Answer	Additional guidance	Mark
7(b)(i)	An explanation that includes the following points: • because antioxidants reduce free radicals (1) • therefore {cell damage / damage to lining of blood vessels / oxidative stress} will be reduced (1) • therefore reducing {plaque / atheroma} formation (due to decreased free radicals) (1)	ACCEPT neutralise / donate electrons to / break down / stabilise IGNORE incorrect consequences	(3)

Question number	Answer	Additional guidance	Mark
7(b)(ii)	An explanation that includes the following points: • {study / data} will not be valid (1) • diet has an impact on CVD (1) • credit an example explained (1)	IGNORE non-dietary factors IGNORE reliability / accuracy ACCEPT {increase risk / decrease risk} in correct context e.g. high salt causes high blood pressure high fibre reduces cholesterol absorption	(3)

Question number	Answer	Additional guidance	Mark
7(b)(iii)	An explanation that includes the following points: • because diet affects a number of risk factors (1) • credit example of change in diet and the risk factor it reduces (1) • credit a second example of change in diet and the risk factor it reduces (1)	IGNORE non-dietary examples e.g. salt intake can be reduced to lower blood pressure {saturated / animal} fats can be reduced to reduce {cholesterol levels / atheroma formation} unsaturated fats can be increased to reduce {cholesterol levels / atheroma formation}	(2)
