

Question	Marking Guidance	Mark	Comments
07.1	Type of selection 1. Directional; Reason: 2. One extreme selected/removed/favoured/ chosen OR One extreme allowed to breed;	2	2. Ignore references to adaptations/ natural selection 2. Accept large fish/small fish for 'extreme'
07.2	1. As a baseline/control; 2. To show effect of no selection OR To show what happens in a normal population/naturally OR To show effect of/ compare with tank A/tank C;	2	2. Ignore reference to type of selection 2. Accept not removing/not catching/not fishing for 'selection' 2. Accept genetic drift for 'no selection' 2. Accept no fishing/no selection/no caught fish for 'normal population' 2. Accept to compare with other results
07.3	Correct answer for 2 marks (How much greater) 1.6 to 1.7;; Accept for 1 mark, 1.2 : 1 and 2 : 1 Accept for 1 mark, 4.1 : 3.4 and 4.8 : 2.4	2	Accept $\frac{5}{3}$ for 2 marks

07.4	Not supported because 1. (Sea) fishing reduces (mean) mass of fish; 2. Because large fish removed OR Because small fish escape/put back OR Because fishing (model) like Tank C; But 3. Information from (only) one species OR Sea fishing catches other/different (types of) species; 4. No statistical test; 5. Size of tank may affect fish growth; 6. Fish in tanks are all same age/sea fish not all the same age; 7. No measure of number of fish (removed)/ only measured mean mass OR No measure of (total) yield of fish OR No measure of reproductive success of fish; 8. Removal of 90% of population is unlikely to be replicated in the sea fishing; 9. Sea fish do not have life cycle of one year OR Sea fish do not reproduce all at the same time;	3 max	2 max for "But"
TOTAL		9
