

- 40** Which statement describes a response of T-lymphocytes when body cells are infected by viruses?
- A** T-helper cells destroy the infected body cells by phagocytosis.
 - B** T-killer cells bind to antigens on the surface of infected body cells.
 - C** T-helper cells release cytotoxins that enter infected cells, resulting in cell death.
 - D** T-killer cells secrete antibodies that destroy the infected body cells.

Permission to reproduce items where third-party owned material protected by copyright is included has been sought and cleared where possible. Every reasonable effort has been made by the publisher (Cambridge University Press & Assessment) to trace copyright holders, but if any items requiring clearance have unwittingly been included, the publisher will be pleased to make amends at the earliest possible opportunity.

To avoid the issue of disclosure of answer-related information to candidates, all copyright acknowledgements are reproduced online in our Copyright Acknowledgements Booklet. This is produced for each series of examinations and is freely available to download at www.cambridgeinternational.org after the live examination series.
