

Question number	Answer	Additional guidance	Mark
7(a)	83 / 83.0 / 83.3 / 83.33 (%) (1)	DO NOT ACCEPT any other values including recurring numbers e.g. $83.\dot{3}$ IGNORE {decrease / - / ↓}	(1)

Question number	Answer	Additional guidance	Mar
*7(b)(i)	Table: - Tasmanian devils spend less time feeding in cancer areas (D) - because there are fewer Tasmanian devils in these areas (E) - because they have died from the cancer (E) - because they are sick and get chased away by the other scavengers (E) - because they are sick and have lost their appetite (E) {ravens / quolls / cats} all spend longer feeding in cancer areas (D) - because there are fewer Tasmanian devils (E) - therefore more food to go round / less competition (E) - because there are fewer Tasmanian devils to frighten them away (E) - because sick Tasmanian devils are too ill to chase scavengers away (E) - ravens, quolls and feral cats in similar proportions in both areas (D) - because they eat different parts of the carcass (E) - so are not in competition with each other (E) Graph: - carcasses in cancer areas are lasting longer than those in the healthy area (D) - because there are fewer Tasmanian devils to feed on the carcass (E) - because they are sick and have lost their appetite (E) - because scavengers do not eat as fast as Tasmanian devils (E) - because scavengers do not eat all the carcasses (E) - but they eventually breakdown by {decomposers / other scavengers} (E)	ACCEPT converse throughout where appropriate Level 1: 1 mark = one description only 2 marks = two descriptions OR one simple explanation Level 2: 3 marks = more than one explanation from either table or graph 4 marks = explanations for both table and graph Level 3: 5 marks = explanations for both table and graph, one of which is extended 6 marks = to include extended explanations for both table and graph NB Extended explanation either offers two alternative explanations or has two steps to it	(6)

Question number	Answer	Additional guidance	Mark
7(b)(ii)	An explanation that includes four of the following points: • (type or number) {microorganisms / insect species} that decompose the carcasses (1) • other species of scavengers as they would also feed on the carcasses (1) • people as this could frighten away the {scavengers / Tasmanian devils} (1) • other predators because they could affect the number of {scavengers / Tasmanian devils} feeding (1) • pathogens as they could affect the number of {scavengers / Tasmanian devils} feeding (1)	ACCEPT competing for carcass ACCEPT named activity of people and the effect NB If no marks awarded, allow 1 mark for a named biotic factor from the mark scheme	(4)
