

37 Species X is a single-celled eukaryote.

Species X has been genetically modified to produce penicillin, which does not harm the cell walls of species X.

What may be concluded from this information?

- 1 The cell walls of species X are chemically different from those of bacteria.
- 2 The cell walls of species X are made of peptidoglycan.
- 3 The cell walls of species X are made of cellulose.

A 1 and 2

B 1 only

C 2 only

D 3 only
