

20 Telomerase is an enzyme that adds nucleotides to telomeres.

Which statement about telomerase is correct?

- A** A high concentration of telomerase in a cell damages genes during DNA replication.
- B** A high concentration of telomerase in cancerous cells limits the rate of tumour growth.
- C** The low concentration of telomerase in stem cells means that these cells can divide an unlimited number of times.
- D** The low concentration of telomerase in body cells means that these cells can divide a limited number of times.
