

- 9 Trehalose is a sugar that gives a negative result when tested with Benedict's solution.

A molecule of trehalose forms two α -glucose molecules when it is hydrolysed.

Which row is correct?

	formula of trehalose	sugar that gives the same result with Benedict's as trehalose
A	$C_{12}H_{22}O_{11}$	fructose
B	$C_{12}H_{22}O_{11}$	sucrose
C	$C_{12}H_{24}O_{12}$	fructose
D	$C_{12}H_{24}O_{12}$	sucrose
