

- 26** Water potentials were measured inside a leaf cell, in the air spaces of the leaf and in the atmosphere.

Which values of water potential (Ψ) would allow water to move from the leaf to the atmosphere?

	Ψ inside the leaf cell / MPa	Ψ of air spaces / MPa	Ψ of atmosphere / MPa
A	-1	-7	-100
B	-100	-7	-1
C	1	7	100
D	100	7	1
