

- 11 Which row shows a correct comparison between a phospholipid molecule and a triglyceride molecule?

|          | phospholipid molecule                  | triglyceride molecule             |
|----------|----------------------------------------|-----------------------------------|
| <b>A</b> | contains a hydrophobic phosphate group | is a hydrophobic molecule         |
| <b>B</b> | contains one glycerol molecule         | contains three glycerol molecules |
| <b>C</b> | fewer ester bonds                      | more ester bonds                  |
| <b>D</b> | more fatty acids                       | fewer fatty acids                 |
