

10 Which statements about triglycerides **and** phospholipids are correct?

- 1 Fatty acids in a triglyceride may be saturated or unsaturated but in a phospholipid they are always saturated.
- 2 Triglycerides and phospholipids both have a hydrophobic region.
- 3 Triglycerides are non-polar molecules and phospholipids are polar molecules.

A 1 and 2

B 1 only

C 2 and 3

D 3 only
