

14 The diagram shows a simple metabolic pathway.

The letters W, X, Y and Z represent four different substances. At each step in the diagram the substrate undergoes a chemical reaction catalysed by an enzyme. The reaction produces the next substance in the pathway.

Which statements correctly describe the enzymes taking part in this metabolic pathway?

- 1 They are all globular proteins.
- 2 They all have the same tertiary structure.
- 3 They all contain hydrogen atoms in their structure.
