

Question Number	Answer	Additional guidance	Mark
1(a)	an answer between 2.5 to 2.7 m	both height and unit required for the mark accept correct answers (whole number only) in cm accept no more than 2 dp if in m	(1)

Question Number	Answer	Additional guidance	Mark
1(b)(i)	phloem	ignore vascular bundle	(1)

Question Number	Answer	Additional guidance	Mark
1(b)(ii)	A description that makes reference to two of the following points: {{(continuous) tube / hollow tube / sieve plate} allows {flow of solution / movement of sucrose / translocation} (1) - contain plasmodesmata allow {entry / exit} of {sucrose / water / molecules} (1) - companion cells to {move sucrose into sieve tube (elements) provide ATP for active transport} (1) (cellulose) cell wall to withstand pressure (1)	ecf for xylem/sclerenchyma/vascular bundle only {{(continuous) tube / hollow tube} allows transport of {water / mineral ions} (1) - pits allow {water / mineral ions} to move to adjoining {cells / vessels} (1) {lignin / secondary thickening} {make vessels walls impermeable to water / water can only leave through pits / withstand hydrostatic pressure / provide support} - thick cell wall to {withstand hydrostatic pressure / provide support} (1) sclerenchyma:	(2)

		• {lignin / secondary thickening} provide support	
--	--	---	--

Question Number	Answer		Mark
1(c)(i)	The only correct answer is C 2 and 3 only <i>A is not correct because sclerenchyma and xylem contain lignin</i> <i>B is not correct because sclerenchyma and xylem contain lignin</i>		(1)
Question Number	Answer	Additional guidance	Mark
1(c)(ii)	An answer that makes reference to two of the following points: • (it has {support / stability} from {(bamboo) pole / another object} (1) • (needs to be flexible to) {grow / bend / wraps} around the {(bamboo) pole / another object / supporting object} (1)	accept lignin provides {strength / support / rigidity} (to cell wall) / converse for low lignin accept climbing plant) doesn't need to be as rigid / needs to be flexible / doesn't need as much support / converse for sunflower accept converse for sunflower plant ignore {growing up / climbing} the pole	(2)
