

**30** Which row correctly identifies the definitions for each of the key terms used in transpiration?

|          | attraction between water molecules and walls of the xylem vessel | effect created by evaporation of water from the surface of the leaf |
|----------|------------------------------------------------------------------|---------------------------------------------------------------------|
| <b>A</b> | cohesion                                                         | adhesion                                                            |
| <b>B</b> | adhesion                                                         | tension                                                             |
| <b>C</b> | cohesion                                                         | tension                                                             |
| <b>D</b> | tension                                                          | cohesion                                                            |
