

**32** Ventricular septal defect (VSD) is a heart defect that people can have from birth. People with VSD have a hole in the wall (septum) that separates the left and right ventricles.

What could happen in a person with VSD?

- 1 Blood will leak through the hole, mostly from right to left.
- 2 The volume of blood circulating through the lungs will be higher than in a person without VSD.
- 3 Less oxygen will be delivered to the body tissues.

**A** 1, 2 and 3      **B** 1 and 2 only      **C** 1 and 3 only      **D** 2 and 3 only
